PROFILE

Performance-driven Frontend Developer with 4+ years of experience architecting scalable web applications. Adept at bridging the gap between rapid application development and pure high-code environments like React and JavaScript. Recognized for optimizing web performance, developing scalable custom UI pattern libraries, and owning full frontend delivery end-to-end—from architecture and component design to production go-lives.

SKILLS

Core Frontend: React JS, JavaScript (ES6+), HTML5/CSS3, jQuery

Architecture & Standards: Responsive Design, Cross-Browser Compatibility, W3C/WCAG, Performance Optimization

Data & Integrations: GraphQL, REST APIs, Payment Gateways

AI & Emerging Tech: Claude API, MCP, Prompt Engineering

Platforms & Low-Code: OutSystems 11, OutSystems Developer Cloud (ODC)

Design & Tooling: Figma, Canva

EXPERIENCE

Software Engineer | Damco Solutions

Mar 2025 – Present

InsureEdge 2.0 & DamcoWorks (Customer 360)

- Spearheaded frontend UI enhancements by overriding default platform constraints with custom JavaScript and CSS, directly elevating user experience and product value (Recognized with a Gold Star Award).
- Architected and maintained a scalable, component-driven UI pattern library (modals, tooltips, notification systems), enforcing cross-module design consistency and significantly reducing feature build times.
- Led IE 2.0 HB Phase 1 production deployment under tight deadlines and high criticality, ensuring seamless go-live, stability, and quality.
- Delivered key Customer 360 screens on time as part of a rapid development team, helping achieve the project timeline (Recognized with a Silver Star Award for going beyond the call of duty).

Architecture & Independent Projects

- Spearheading the development of a custom tool to reverse-engineer low-code platform files (OML) into standard high-code frameworks, demonstrating a deep understanding of DOM architecture, code compilation, and component abstraction.
- Conducted architecture reviews and provided ongoing frontend support for the JTR project.
- Pursuing Anthropic Academy certification (Claude Code in Action), building AI tooling and integration capabilities aligned with frontend systems design goals.

Software Engineer | Ranosys

Sep 2022 – Mar 2025

Various Projects (AUB, BrillDog, ISS PAM App, CHC)

- Served as sole frontend developer and owner, independently designing and implementing the entire frontend architecture, setting a high bar for future projects and significantly enhancing product UX.
- Engineered and customized complex data-grid and interactive form components using modern web standards to meet specialized, data-heavy insurance domain requirements.
- Led frontend performance optimization initiatives, auditing rendering bottlenecks to minimize page load times and improve cross-device responsiveness.
- Integrated complex third-party services, utilizing GraphQL for dynamic shipment workflows alongside mapping and secure payment gateway integrations.
- Delivered fully responsive, cross-device interfaces and led client-facing product demos, communicating design decisions directly to stakeholders.
- Developed responsive interfaces for a residential society maintenance app, event scheduling workflows, and a mobile banking platform redesign, including mentoring junior UI developers.

Software Engineer | HawksCode

Jul 2021 – Sep 2022

- Executed advanced web performance optimizations (including asset minification, lazy loading, and DOM streamlining), successfully driving Google PageSpeed Insights scores from 70% to an optimized 95%.
- Engineered pixel-perfect, highly responsive frontend architectures from Figma and PSD layouts, ensuring semantic code structures and cross-device fluidity.
- Mentored junior frontend developers in UI best practices and performance standards, significantly accelerating team onboarding and delivery velocity.

HONOURS & AWARDS

- **Gold Star Award (Above and Beyond) – Damco | Aug 2025:** Recognized for delivering quick, impactful UI enhancements beyond default capabilities, significantly elevating user experience on InsureEdge 2.0.

- **Silver Star Award (Above and Beyond) – Damco | Dec 2025:** Commended for delivering the high-criticality IE 2.0 HB Phase 1 production deployment on schedule despite tight timelines.
- **Silver Star Award (Beyond the Call of Duty) – Damco | Apr 2025:** Awarded as part of the Rapid Development Team for exceptional contributions to achieving the DamcoWorks Customer 360 project timeline.
- **Team Player Award – Ranosys | Jan 2024:** Recognized for collaborative contributions, teamwork, and a positive operational impact across multiple projects.

CERTIFICATIONS

- **Claude Code in Action** – Anthropic Academy
- **Front-End Developer Specialist** – OutSystems 11
- **Associate Developer** – OutSystems Developer Cloud (ODC)
- **Associate Reactive Developer** – OutSystems 11

EDUCATION

B.Tech in Computer Science

2017 – 2021

University of Petroleum and Energy Studies

Core Focus: Data Structures, Algorithms, Software Engineering, Web & ML projects, and Hackathons.
